Students praised Informatics for quality programmes

8 July 2005, Singapore – Students praised Informatics for its quality programmes, experienced lecturers and being a professional institution.

“I heard a lot of good things about Informatics...I trusted Informatics because they lead students through its globally-competitive curriculum. I have gained a lot of knowledge; what I have learnt from Informatics is far more advanced compared to other schools. I have friends from other institutions and they are amazed how advanced I am. I became more confident. Since Informatics has helped in my career, I will definitely endorse it to my friends.” Kevin Florida, student of Informatics Philippines.

“The experienced lecturers and up-to-date programmes attracted me. This programme provides in-depth knowledge and education guideline which really help my current employment. I’m a technical support engineer and this programme will definitely help me to achieve my career goals. This programme is highly recommended to anyone as it is conducted by a very professional institution.” Hoy Siew Maan, BSc in Computing and IS awarded by Oxford Brookes University, student of Informatics Singapore.

BSc in Computing and Information System – Oxford Brookes University

About the University

Oxford Brookes today is one of the UK's most successful new universities, attracting students from throughout the UK and worldwide. Why do so many people choose to come to Oxford Brookes? Our international reputation is one reason. Another is the exciting range of courses, subjects and research we offer. Then there is the friendliness of our community, where the needs of our students always come first. Everything we do is evaluated in terms of student provision, in order to provide the optimum learning environment and encourage personal and intellectual growth.

Most of all, students choose Oxford Brookes because of our commitment to excellence in learning, teaching and research. In addition to our own stringent monitoring of quality, our courses and research are regularly evaluated by outside assessors.

At well above the national average, the employability ratings speak for themselves: [The Times Good University Guide 2004](#) lists Oxford Brookes as joint 20th with an employability rating of 77.5%, while [The Guardian](#) rates them similarly at 23rd place.

Scores (out of 24) for teaching excellence

24	Business and Management, Economics and Planning
23	Biology, Building, Environmental Sciences, Fine Art, History of Art, Psychology, Religious Studies, Theology and Real Estate Management

22	French, Italian and Spanish, Hotel and Restaurant Management, Politics, Mathematical Sciences and Statistics
21	Publishing, Sociology and Educational Studies

About the programme

This programme enables the students to gain knowledge and understanding, and to develop a range of skills and competencies highly appropriate for computing in industry, commerce or research.

This programme combines some of the generality of the computing course with modules concerned with the development of information systems. An information system is a set of people, data, procedures, hardware and software that work together to achieve the common goal of information management. Information management includes the tasks of gathering data; processing the data into reliable, accurate, and usable information; and distributing the information in a timely fashion for use in decision making, problem solving, and control. Information systems exist within organisations in commerce, industry and the public sector. Therefore, while it is primarily a computing discipline, it involves an understanding of organisations, management, information and the information needs of organisations.
