

## They have an internationally recognised qualification and a dream job...

**26 August 2005, Singapore**-Informatics, a provider of quality lifelong learning services offers a full range of higher education programme awarded by world renowned universities from the UK and Australia. It ranges from Business, Information Technology, Education, Engineering, Nursing and Hospitality & Tourism.

Tracing back, Informatics has accepted many students with local qualifications into its internationally recognised undergraduate and postgraduate programmes. This gives opportunities to many students who hold a local qualification, unable to go overseas to further their studies due to various constraints a chance to receive foreign education recognised by employers around the world. This qualification may be the key to the door of an international career.

International careers have long been the path up the corporate ladder. In earlier years, these positions include substantial benefits, both financial and personal, with first class travel, unlimited expense accounts, and free time to enjoy the local culture.

'However, today's overseas assignments typically bring long hours, minimal economic reward, and coach class travel. Yet the reward of upward mobility within the corporate world continues to lure young executives to global assignments.'

## They have an internationally recognised qualification and a dream job...

"It helped a lot in my career; I'm a software programmer in Lals Group located in United Arab Emirates."

*Sharjeel Zaheer Uddin Mohammed Ali*

*Originated from Pakistan working and residing in the UAE*

*Entered the BSc in Computing awarded by University of Portsmouth with*

*Qualification-Higher National Diploma awarded by Scottish Qualification Authority*

"I signed up for this programme because I could complete the entire course online, giving me the opportunity to work full time and plan my studying time. The costs of the programme were reasonable for getting a degree directly from the University of Portsmouth.

I have gained good expertise in all the modules that I have completed during my course. I would like to point out that my lecturers were absolutely brilliant and I thank them for all their assistance. I could not have completed the programme without their indispensable guidance. They are always there to help you and give you as much support as you require during the course.

Currently, I work as a Legal Secretary in a solicitors practice in London. The qualification I have acquired from the programme will allow me to pursue a conversion course in IT Law.

I would definitely recommend this programme to anyone who is looking for flexibility in their studies; especially for people working full time this is an opportunity to extend your horizons.”

*Priya Balgobin*

*Originated from Mauritius, working and residing in the UK*

*Entered the BSc in Computing awarded by University of Portsmouth with Qualification-BTEC Higher National Diploma in Information Technology*

### **Greater opportunities in International Employment Market**

‘The continuing demand for cost containment and cost reduction, and the changing demands of global business have resulted in many changes in the pattern of international assignments in the past few years. We are now seeing a much wider range of international assignment arrangements...’

[Source: Ernst & Young – UK]

"While the global job market continues to be challenging, signs of a worldwide recovery raise expectations for new international job and career opportunities." Stephen Taylor, Executive Director of the International Business Center.

"The world has moved to a global economy. Future Executives will be those who have experience in International Business." Mark Chang, CEO and founder of JobStreet.com

Indeed, one holding an internationally recognised qualification has an edge over candidates holding a local qualification. With a local certificate, one may be constrained to find jobs within the country, working overseas can only be a dream. However, Informatics may be able to turn your dream into reality.
