In pursuit of an MBA in Macau

17 January 2006, Singapore - We all have the same 24 hours in a day but not all of us know how to make full use of that time. Senior Executive Carmen Ng from Macau is a great planner. She's one who knows her goals and sets the time to pursue her interests.

The MBA student with the University of Wales through Virtual School PurpleTrain.com, Carmen often spends her break times in the office checking on study materials and enjoys the flexible study method which allows her to interact and gain experiences from her course mates who are all scattered across the globe. She's made a few good friends in the course of her study and as a group they help each other out in terms of revisions and discussions for assignments. Carmen finds the discussion room facility very useful and enjoys it a lot.

"This course makes me understand more about the principles of many subjects. I've been exposed to so many new things that it drives me to find out more," says Carmen, who gives the example of her sudden interest in the financial market.

Quoting a phrase that she heard during an office meeting, Carmen says that her source of inspiration is this particular phrase which she'd like to share with fellow e-Learners: *"Learning is a long trip, don't expect to learn more from a short trip"*. Carmen shares further by saying that results are never instantaneous and one has to put in consistent effort to ensure good results.

Carmen enjoys all things musical and in fact took this love one step further by working as a part-time DJ in a radio station once. Carmen, we hope that you will continue to enjoy the sweet tunes of e-Learning with PurpleTrain.com even after the completion of your MBA!
