### NEWS RELEASE

## **INFORMATICS IS FIRST TO OFFER FLEXI-LEARNING PROGRAMMES**

**> Flexi-Learning offers greater flexibility to cater to the dynamic needs of today's students in a global environment**

**Singapore, 4 April 2005** – Informatics, a provider of quality lifelong learning services, is the first to launch its Flexi-Learning programme to cater to the dynamic needs of today's students.

Informatics Flexi-Learning programme offers greater flexibility to students to facilitate them to achieve their academic goals 'easier'. Flexi-Learning programme is modular and offers a combination of face-to-face lectures together with online e-tutorials.

"The Flexi-Learning programme is completely modular in structure, integrating both face-to-face lectures and online learning. This blended mode provides students a high degree of flexibility and enables them to plan and manage their time more efficiently and effectively," said Dr Michael Teng, Chief Executive Officer of Informatics.

"In addition, there is the option in the Flexi-Learning programme which enables students to study one module at selected Informatics education centres of their choice," continued Dr Teng.

Informatics has tied up with several partner universities to launch the Flexi-Learning programme. Students will be conferred the same internationally-recognised qualifications as those who do the programme on-campus.

“We are aware of the need to cater to today’s dynamic students. Many of them are hungry for knowledge and experience. With Flexi-Learning, students can further their studies and get relevant work experience at the same time. The flexibility and convenience complement their lifestyle. This is a win-win arrangement,” added Dr Teng.

The Informatics Flexi-Learning programme offers a wide range of courses ranging from Diplomas, Advanced Diplomas, Bachelor’s Degrees to Master’s Degrees, in diversified disciplines such as Business Computing, Technology Management and Business Administration.

For more information about this programme, please email: [programmes@informaticsgroup.com](mailto:programmes@informaticsgroup.com).
